

August 2024

Dear Parent / Guardian of a Primary School Mathematics achiever

AdMaths is an extra *subject* and not an extra *class* in school maths. The aim of the subject is to stimulate and enrich a learner, who is already performing well in Mathematics or has a great interest in the subject, by augmenting the school syllabus.

Why is AdMaths recommended in high school?

Many students testify that school mathematics did not adequately prepare them for first-year mathematics at university. Although they obtained 80% or more at school, they struggle to adjust at university, especially in the first six months. Enrichment in addition to the CAPS curriculum is highly recommended for fields like Engineering, B.Sc., B.Comm. and Actuarial Science. AdMaths helps to bridge the gap left by the abolishment of Mathematics Higher Grade in 2007 and it offers more of a challenge to the bright, but bored learner.

Why Primary School AdMaths?

We have found that many learners who start AdMaths in Grade 10 are not ready to do advanced mathematics. The problem is that our gifted learners are not challenged enough in school. Many easily obtain 80% for Mathematics and then qualify to do AdMaths. Suddenly they learn for the first time that only hard work brings success. Many are disillusioned by the required adjustment. They are our future doctors, engineers and accountants who need the intellectual stimulation and exposure for university.

How do we change this? One of the ways is to lay an excellent foundation in high school mathematics and work ethics while they are at primary school.

Are there in-person contact sessions?

For information on your closest centre visit www.admaths.co.za >> *PARTICIPATING SCHOOLS*. The contact sessions (*Garden* package) occur once per week in term time and are 1 hour in duration. On the *Blossom* package, learners attend the weekly, live webinar. On the *Sprout* package learners only have access to the general study material, which includes pre-recorded videos.

Study material and assessment

The study material is quarterly made available electronically on the learner's profile and the hard copy may be ordered by clients at www.admathsretail.co.za. All clients are also linked to pre-recorded video lectures that explain the content. Learners submit a short assignment weekly and write a formal test once per quarter.

Grade 5 point of entry: Euclid >> Euler >> Gauss

All Grade 5 newcomers start at Year Euclid. Then they move on to Euler in Grade 6 and Gauss in Grade 7.

May a learner start in Grade 4 already with Euclid?

We will allow this. In Grade 7 the learner does the Newton bonus year. Take note that Newton is not necessarily available on *Garden*.

Grade 6 point of entry: Descartes >> Fermat

All Grade 6 newcomers start at Year Descartes and move on to Fermat in Grade 7.

Packages and Registration

Find included a page that elaborates on the *Jungle*, *Garden*, *Blossom* and *Sprout* packages with their respective monthly instalments.

The yearly fee on (e.g.) the *Garden* package (in-person classes; hard copies excluded) is R6120, which is the sum of 12 payments of R510 each from 1 January to 1 December 2025.

Complete the application form at www.admaths.co.za >> *APPLY* by the latest **Monday 2 December 2024**.

The course “starts” when the study material is made available on 15 December 2024 and the live schedule starts in the week of 23-27 January 2025.

All first-time participants pay a registration fee of R510. We send an invoice with banking details and a due date on or before **Friday 6 December 2024**.

Do you sign a contract with AdMaths?

Yes, you will receive an email from esign@admaths.co.za. You may cancel the contract by submitting a month’s notice at junior@admaths.co.za. You may migrate between packages.

What happens at the end of a year?

There is an administrative fee of R200 payable to extend the contract for another year.

AdMaths reserves the right to close the class of a *Garden* service of which the number of learners has become too few to operate viably.

We look forward to having the learner on the programme.

For more information consult www.admaths.co.za or email junior@admaths.co.za.

Kind regards

Jean Nico de Villiers
Principal

2025 Grade 4 - 7

PACKAGES

*Terms & conditions apply. The course fee is divided into monthly instalments.
Classes are still to the discretion of the principal depending on how many students enroll for a class.

VIP JUNGLE PACKAGE

- ✓ Weekly scheduled in-person and/or online class
- ✓ Online access to study material and pre-recorded video lectures
- ✓ Hard copies of the study material are delivered
- ✓ VIP gift

R715 pm per student

GARDEN PACKAGE

- ✓ Weekly scheduled in-person class
- ✓ Online access to study material and pre-recorded video lectures
- ✓ Hard copies of the study material may be ordered

R510 pm per student

BLOSSOM PACKAGE

- ✓ Weekly scheduled online class
- ✓ Online access to study material and pre-recorded video lectures
- ✓ Hard copies of the study material may be ordered

R426 pm per student

SPROUT PACKAGE

- ✓ No contact time, just self-study
- ✓ Online access to study material and pre-recorded video lectures
- ✓ Hard copies of the study material may be ordered

R354 pm per student
